

Dr. Edward Randell, PhD, FCACB, DCC

Dr. Randell has been active as a clinical biochemist and researcher for more than 35 years, with a consistent track record of advancing science and clinical practice through his personal involvement in research.

Dr. Edward W. Randell, PhD, FCACB, DCC, is a Certified Clinical Chemist, Fellow of the Canadian Academy of Clinical Biochemistry and Fellow of the American Association for Clinical Chemistry. He is currently Clinical Chief, Department of Laboratory Medicine, Eastern Health, St. John's, NL and Director of Clinical Laboratory Services, Laboratory Reform Initiative, Medical Services-Health and Community Services, Government of Newfoundland Labrador.

Dr. Randall is a Professor and Vice-Chair, Discipline of Laboratory Medicine, Faculty of Medicine, Memorial University, St. John's, NL. Dr. Randall also has cross appointments in the Discipline of Medicine, Faculty of Medicine, School of Pharmacy, and Department of Biochemistry, Faculty of Science, Memorial University.

Dr. Randall holds many distinctions and awards such as;

- Memorial University Medical Research Foundation Cox Award March 2022
- IFCC visiting Lecturer to the Asia-Pacific Federation for Clinical Biochemistry Nov 2019
- Canadian Society of Clinical Chemists award for Outstanding Contributions to Clinical Chemistry Aug 2017.
- Canadian Society of Clinical Chemists award for Education Excellence June 2016.
- Canadian Academy of Clinical Biochemistry award for Outstanding Service to the Profession of Clinical Biochemistry June 2016.

Dr. Randall has been very successful throughout his career at securing grant funding for his research, working collaboratively with other healthcare professionals, and mentoring young researchers (including clinical biochemists, research fellows, medical students, and medical laboratory technologists). At last count Ed has produced 132 peer-reviewed publications and over 90 abstracts and presentations. His most recent research has involved metabolomics, nutrition, epidemiology, and various aspects of clinical lab quality and his work has had 5332 citations.

Dr. Randell has been engaged with over 100 students and colleagues and most notably, he has also encouraged and enabled many others to be involved in laboratory medicine research and contribute in their own right. Dr. Randall can be seen working on the bench along side members of his research team, is easily accessible and enthusiastic as a mentor.
